

Start to finish

Streamline your outdoor upgrade with a company that provides the complete package

AN EXPERTLY BUILT, THOUGHTFULLY DESIGNED OUTDOOR ROOM OR HOME extension is a lifestyle asset. It provides you with additional living space and can forge an indoor-outdoor connection that increases your opportunities for entertaining throughout the year.

But the construction of the extra living space is only part of the success equation. The new structure needs to sit harmoniously within its surrounds, which is why you need a company that can also provide a broad range of landscaping services. Select Outdoor Solutions is such a company.

Headed by company owner, Peter Neagoe, Select Outdoor Solutions provides the full gamut of landscape design and construction services, which includes the creation of custom water features, in addition to its expertise in the design and construction of decks, pergolas, home extensions and interior renovations.

Select Outdoor Solutions prides itself on providing the total package for its customers. “We design and construct every element of a job and we project manage all on-site works. Basically, we take care of the lot — from the design concept plans to completion,” says Peter.

OUTDOOR STRUCTURES

“We are also very proud of the level of customer service we provide throughout the entire process and our ability to meet a client’s budgetary requirements, complete on-site works on time, and create an end result that the client will fall in love with,” he adds.

While a well-built, well-designed outdoor room and landscape adds value to a property, which is a boon should you want to sell in the future, it also enhances the lifestyle of the people who call that property home. Says Peter: “Once the brief has been given, we go about creating gardens and entertaining areas that complement and enhance the clients’ lifestyle. Our goal is to get the family outside and enjoying their outdoor spaces.”

With Select Outdoor Solutions, you have the bonus of working with a company skilled in internal renovations and home extensions so if that is also

on your agenda, you can have the work on your home, outdoor living structure and landscape all carried out by the one company, saving time and hassle.

Peter Neagoe has more than 40 years’ experience in the landscaping and building industries and has run his own business for more than 30 years. In addition to offering extensive design and construction experience, Peter is a registered builder and landscaper, which means you know you are dealing with a fully qualified practitioner.
